

PENDING CLAIMS  
Application No. 10/787,441  
Attorney Docket No. 05725.0795-02000  
Filed: February 27, 2004

Claims 1-119. (Canceled)

120. (New) A method of making up eyelashes comprising applying to said eyelashes a mascara comprising:

- (i) at least one solid substance that has a melting point of about 45°C or greater;
- (ii) isododecane;
- (iii) at least one structuring polymer chosen from polymers of following formula (I):

in which n is an integer which represents the number of amide units such that the number of ester groups present in said at least one structuring polymer ranges from 10% to 50% of the total number of all said ester groups and all said amide groups comprised in said at least one structuring polymer;

-  $\text{R}^1$ , which are identical or different, are each chosen from alkyl groups with at least 4 carbon atoms and alkenyl groups with at least 4 carbon atoms;

-  $R^2$ , which are identical or different, are each chosen from  $C_4$  to  $C_{42}$  hydrocarbon-based groups with the proviso that at least 50% of  $R^2$  are chosen from  $C_{30}$  to  $C_{42}$  hydrocarbon-based groups;

-  $R^3$ , which are identical or different, are each chosen from organic groups comprising atoms chosen from carbon atoms, hydrogen atoms, oxygen atoms and nitrogen atoms with the proviso that  $R^3$  comprises at least 2 carbon atoms; and

-  $R^4$ , which are identical or different, are each chosen from hydrogen atoms,  $C_1$  to  $C_{10}$  alkyl groups and a direct bond to at least one group chosen from  $R^3$  and another  $R^4$  such that when said at least one group is chosen from another  $R^4$ , the nitrogen atom to which both  $R^3$  and  $R^4$  are bonded forms part of a heterocyclic structure defined in part by  $R^4$ -N- $R^3$ , with the proviso that at least 50% of all  $R^4$  are chosen from hydrogen atoms;

- (iv) water;
- (v) at least one coloring agent; and
- (vi) at least one preservative.

121. (New) The method of making up eyelashes according to claim 120, wherein said mascara further comprises at least one neutralizing agent.

122. (New) A method of making up eyelashes comprising applying to said eyelashes a mascara comprising:

- (i) at least one solid substance that has a melting point of about  $45^{\circ}\text{C}$  or greater;

- (ii) isododecane;
- (iii) at least one structuring polymer chosen from ethylenediamine/stearyl dimer tallate copolymers;
- (iv) water;
- (v) at least one coloring agent; and
- (vi) at least one preservative.

123. (New) The method of making up eyelashes according to claim 122, wherein said mascara further comprises at least one neutralizing agent.

124. (New) A method of making up eyelashes comprising applying to said eyelashes a mascara comprising:

- (i) at least one solid substance that has a melting point of about 45°C or greater;
- (ii) isododecane;
- (iii) at least one structuring polymer chosen from ethylenediamine/stearyl dimer dilinoleate copolymers;
- (iv) water;
- (v) at least one coloring agent; and
- (vi) at least one preservative.

125. (New) The method of making up eyelashes according to claim 124, wherein said mascara further comprises at least one neutralizing agent.
